PARTNERSHIP WITH OHIO SCHOOL OF PHLEBOTOMY

Purpose

Student Health Services partners with the Ohio School of Phlebotomy to provide clinical training for the school's post-classroom students. Students rotate through the laboratory at the Wilce Student Health Center where they obtain supervised experience performing phlebotomy.

The Ohio School of Phlebotomy was founded in 2009 with the mission of raising the standard of care in our community by providing well-trained and highly skilled ancillary medical professionals such as phlebotomists.

Impact

Students can participate in two laboratory opportunities for clinical experience:

- 1) sample collection in the routine laboratory at the health center or
- 2) sample collection during large programs such as tuberculosis screenings where hundreds of blood samples are collected during half-day programs.
